

# KINDRED'S DALLAS/ FORT WORTH

## INTEGRATED CARE MARKET SERVICES

### CONTINUE THE CARE

Kindred's expertise across the post-acute spectrum allows us to provide patient care in the proper care setting and help patients recover to the fullest extent. We specialize in delivering quality medical interventions and transitioning patients to the lowest cost setting that meets their health needs and enhances their quality of life.

#### **Transitional Care Hospitals**

Our transitional care hospitals (certified as long-term acute care hospitals) provide specialized, goal-directed care for critically ill patients requiring extended recovery time. Licensed as acute care hospitals, we have an additional Medicare certification that supports a length of stay measured in weeks as compared to the typical five-day stay for patients in traditional hospitals.

We offer 24-hour physician support and the ancillary services found at an acute care hospital, including laboratory, radiology, operating or procedure rooms, special care units and telemetry units. Our specialized care includes: pulmonary care (ventilator management and weaning), complex wound care, dialysis, IV antibiotic therapy and pain management.

#### **Inpatient Rehabilitation Hospital**

Through expert, intense interdisciplinary care and aggressive therapy, our freestanding inpatient rehabilitation hospital – certified as an inpatient rehabilitation facility (IRF) by the Centers for Medicare and Medicaid Services (CMS) – is designed to provide rapid recovery and improved function for patients who can tolerate at least three hours of rehabilitative care per day. Additionally, this setting provides physician-supervised interdisciplinary care for patients who have a clinical need for therapy in at least two disciplines, daily physician oversight and 24-hour nursing care.

#### **Subacute Unit**

Situated within our transitional care hospital, our subacute unit is designed to successfully transition patients to a less intense level of service, such as a skilled nursing center, or home with additional services. The unit provides comprehensive inpatient medical care and rehabilitation for those patients with an acute illness, injury or exacerbation of a disease who no longer require the high intensity, aggressive medical care provided in a hospital.

Being co-located with our transitional care hospital enables care and treatment by the same physicians, therapists and care professionals, helping ensure a coordinated transition and improved outcomes.

#### **Transitional Care and Rehabilitation Centers**

From specialized short-term, inpatient rehabilitation to compassionate long-term care, our centers provide a full range of medical, rehabilitative and social services to treat and support each of our patients. Our goal is to help patients achieve positive outcomes, regain function and safely return home as quickly as their recovery allows. Our services include physical, occupational and speech-language therapy, skilled nursing, dementia care and specialized short-term rehabilitative programs that address a wide variety of conditions.

#### **Home Care**

##### *Home Health*

Kindred at Home and IntegraCare, an affiliate of Kindred at Home, provide medical care and services – including nursing care, wound care and rehabilitation therapies – delivered in the comfort of a patient's own home. Experienced nurses, therapists and aides work to maximize physical abilities, improve health and wellbeing, and to provide essential education and management of medications and medical conditions.

##### *Hospice*

Our hospice professionals provide a family oriented model of care in order to meet the physical, spiritual and emotional needs of terminal patients and their families. Our multidisciplinary services enable patients to stay in a familiar and comfortable environment while delivering pain management, aggressive comfort measures and psychological support to create the best possible end-of-life experience.

##### *In-Home Physician Care*

Our physicians, nurse practitioners and nurses provide compassionate medical care in the homes and assisted and independent living facilities of Dallas-area seniors. Our board-certified physicians direct complete primary care, specialty care and urgent care services for people who cannot leave home to visit the doctor.
